Dear SLR Consulting

Thank you for acknowledging Cape Agulhas Municipality as an I&AP. We trust this public participation will be conducted in the true spirit of soliciting public engagement, in a consultative process with mutual dialogue, to achieve the desired outcome. Kindly advise us a governmental department what the desired objective of the project is and what technical process will be adopted to achieve the desired outcome, including timelines for the duration of the project.

Warm Regards,

Subject: ESIA registration for proposed offshore exploration in blocks 5/6/7 South-West coast, South Africa

Hello,

Project Reference: 720.20047.00006

Please could you register me as an interested and affected party and add me to the preliminary ESIA stakeholder database for Block 5/6/7.

NAME: Elaine Mills
ORGANISATION NAME: Greenpeace Cape Town Volunteers
ORGANISATION DESCRIPTION (Field and Area of Activity): Environmental NGO
POSTAL ADDRESS: 307 Hillside Heights, Wessels Road, Green Point, Cape Town
POSTAL CODE: 8005
CELL PHONE NUMBER: 066 485 9785
E-MAIL: [REDACTED]

PLEASE DESCRIBE YOUR INTEREST IN THE PROPOSED PROJECT:

The project's potential harmful impacts on the marine environment and fishing communities, as well as the fact that more oil and gas will further exacerbate climate change. The recent KwaZulu-Natal floods in which nearly 500 died and more than 40,000 were left homeless is just one example of global warming's devastating co.

Thank you for providing clarification. We are interested in registering as I&APs during public consultation process of this project.

Kind Regards,

On Thu, Apr 28, 2022 at 2:18 PM TEEPSA-567 <TEEPSA-567@slrconsulting.com> wrote:

Dear Green Connect

There is no deadline to registering on the stakeholder database for the proposed project. Registration will continue throughout the EIA process.

Additional project information will be made available when the draft Scoping Report is released for review and comment in mid to end May 2022. Registered I&APs will be notified when this report is available for review and comment in due course.

Please be advised that TEEPSA is not proposing to undertake a 2D/3D seismic survey in Block 5/6/7 (as indicated in the subject), but rather exploration well drilling. For more information on the project, please visit <https://totalenergies.co.za/totalenergies-exploration-production>.

Regards,

TEEPSA-567 Stakeholder Engagement Team

Goody TEEPSA,

Apologies for delayed response. It's been a very busy week repairing in Durban. We will make relevant adjustments on our website.

Can we assume that you will be conducting vertical seismic profiling during exploratory drilling?

We look forward to your response,
Janet

Good day to whom it would concerns at Teepsa,

Regards the seismic header - I replied with a question that has not been answered satisfactorily - will you be performing Vertical Seismic Profiling during exploratory drilling operations? Once we have that answer confirmed (ie we will not be conducting VSP or any other form of seismic operations) we will adjust our heading accordingly. Our understanding is that VSP is par for the course during exploratory drilling and hence the heading remains.

Regards,
Janet

Subject: Registration as Interested and Affected Party

Good day,

I am a resident of Stanford, and would like to register as an interested and affected party for this project.

I hope that you are aware that the Agulhas Plain is one of the highest biodiversity hotspots in the world (Cape Floral Kingdom), with approximately 2400 identified plant species located within the region

The coastline around the Cape Agulhas region is also incredibly biodiverse as a result of the converging Agulhas and Benguela currents, attracting numerous whales, sharks and dolphins. Geysers Rock, just off the coast of Gansbaai is one of the last remaining habitats of the critically endangered African Penguin.

The region is primarily dependent on tourism and subsistence fishing for its existence. How will the seismic exploration influence all of the factors that make our area special? What mitigating measures will be in place? How will communities be affected? How will the seismic exploration influence our breeding whales and the associated tourism? What influence will it have on our already dwindling fish stocks and how will small scale fishers be compensated for their losses as a result of this survey?

I strongly feel that we should not lose our natural assets which are valuable to all of the Overberg and Western Cape economy for human greed.

My details are:

To Whom it May Concern:

We write to register Natural Justice as an interested and affected party with respect to the proposed offshore exploration in Block 5/6/7. Attached please find a completed registration form.

Natural Justice: Lawyers for Communities and the Environment is a non-profit organisation specialising in environmental and human rights law in Africa—with a focus on the pursuit of social and environmental justice for local and indigenous communities.

Natural Justice offers direct support to local and indigenous communities impacted by the ever-increasing demand for land and resources, through legal empowerment. Natural Justice also conducts comprehensive research on environmental and human rights laws, as well as engaging in key national and international processes with, for and alongside indigenous peoples and local communities.

The organisation has an interest in this particular project with regard to the project's potential impacts, both direct and indirect, which will affect the marine environment and the local and indigenous peoples and communities who rely on the waters in the project area.

Good day

Kindly find attached comments from Bergrivier Municipality.

Information from the attached is also typed below, should my handwriting be difficult to read:

“As stated under administrative and legal framework: ‘proposed drilling would result in various forms of disturbances to the sea floor.’”

There is a concern as to the extent and impact of this disturbance to the sea floor, and then again towards the aquatic flora and fauna and the total ecological sustainability of the Marine environment in which this will be conducted (proposed drilling) for the South- West Coast.

The severity of the disturbances that will be caused by the proposed well drilling is undetermined and this may result in irreversible damage to the Marine environment”.

Kind regards

Angila Joubert

Subject: TotalEnergies EP South Africa – ESIA for proposed exploration in Block 5/6/7, off the South-West Coast of South Africa: Notification of draft Scoping Report and invitation to public meetings

Dear Sir / Madam

Attached letter refers.

TotalEnergies EP South Africa Block 567 (Pty) Ltd (“TEEPSA”) has applied to the Department of Mineral Resources and Energy (DMRE) for Environmental Authorisation (EA) to undertake exploration well drilling in Block 5/6/7 off the South-West Coast of South Africa. SLR Consulting (South Africa) (Pty) Ltd ("SLR") has been appointed as the Independent Environmental Assessment Practitioner to undertake the Environmental and Social Impact Assessment (ESIA) process for the proposed project.

SLR has compiled a draft Scoping Report, which is available for a 30-day review and comment period from 20 May to 20 June 2022. Refer to letter for report availability. Comments on the draft Scoping Report should reach SLR by **no later than 20 June 2022**.

We cordially invite all stakeholders to attend the planned public meetings listed in Table 2. Refer to letter for meeting details.

As a Ward Councillor, SLR kindly requests your assistance to circulate this information to members of your Ward.

PLEASE PROVIDE COMMENT ON THE PROPOSED PROJECT AND DRAFT SCOPING REPORT BELOW (use extra pages as required):

Disturbance caused damage to the seabed during the drilling operations. Drilling fluid and cuttings are discharged into the ocean from mudsinks. Drilling as stated in the report will result in pollution of the seas and affecting the health of marine animals. There will be an disturbance to ecosystems with the damage caused in the seabed by the drilling stages in block 5/6/7. The spawning of fish species as well as other marine species will be negatively affected by the drilling operations.

Please return completed forms to SLR:

PLEASE PROVIDE COMMENT ON THE PROPOSED PROJECT AND DRAFT SCOPING REPORT BELOW (Use extra pages as required):

The area of interest for proposed exploration drilling overlaps with the Atlantic Southeast IRLBMA, which is a distinct area that have been identified to provide essential habitat for several rare bird species as stated in the report. Therefore this project could disturb the habitat for bird species in the area.

Subject: Comment

Good morning

I would like to comment on the draft scoping report for the exploration by TotalEnergies EP South Africa for block 5/6/7 which allows for the undertaking of inter alia 2D and 3D seismic and controlled source electromagnetic surveys.

The area targeted for exploration is extensive in breadth and depth, 10 000km² and depth of between 700 and 3200m and includes a large portion of the Critically endangered coastal ecosystems. Although the list of marine fauna is extensively listed, the impact on marine life of the proposed surveys is not described. If the impact is unknown or not clearly determined then the precautionary principle needs to be adhered to. Without specific information on the impacts of the surveys on e.g. endangered marine mammal species then it is not advisable to proceed with the surveys.

As the Environmental Manager at Knysna Municipality, I **do not support** the proposed surveys for block 5/6/7 until there is unequivocal proof provided by independent marine biologists that there are no negative impacts on the marine ecosystem in the target area.

Subject: TotalEnergies – ESIA for proposed exploration drilling in Block 5/6/7

Good Day,

I attended the virtual meeting which was held on 07 June. I do have one question which appears not to have been addressed in the various presentations, nor raised during the question and answer session. I must confess that I was compelled to leave the meeting midway through the question and answer session.

Whilst the maps and diagrams defined where there might be concerns for the fishing industry and environmentally sensitive areas, no mention was made regarding the migratory routes of the Southern Right Whales. Does the proposed area, earmarked for exploration, in anyway conflict with the normal migratory routes of this whale species? I am quite sure that there must be a route that these animals follow both when they enter our region and when they depart 6 months later and I am certain that this will be documented. Should we not be concerned that the Southern Right Whales might look for alternative breeding grounds or worse still, stop breeding, should the proposed drilling zone be in conflict with their normal migratory path?

I look forward to your response.

Yours sincerely

Dear Project Team

I have attached a written application to be registered as an interested and affected person with regard to the proposed exploration well drilling in Block 5/6/7 off the South-West Coast of South Africa by Total Energies ("TEEPSA 567").

Please confirm receipt of this registration.

Regards
Dr CA Engelbrecht

ENVIRONMENTAL AND SOCIAL IMPACT
ASSESSMENT (ESIA) REGISTRATION

PROPOSED OFFSHORE EXPLORATION IN BLOCK 5/6/7,
SOUTH-WEST COAST, SOUTH AFRICA

NAME / CONTRACT PERSON	DR CA ENGELBRECHT		
ORGANISATION NAME	EXTINCTION REBELLION		
ORGANISATION DESCRIPTION (Field and Area of Activity)	ENVIRONMENTAL ACTIVISM		
POSTAL ADDRESS	PO BOX 1678 GANSBAAI		
POSTAL CODE	7220	FAX NUMBER	
TELEPHONE NUMBER		CELL PHONE NUMBER	
E-MAIL			
DATE 1/6/2022	SIGNATURE		<i>CA Engelbrecht</i>

PLEASE DESCRIBE YOUR INTEREST IN THE PROPOSED PROJECT:

1. AS AFFECTED PERSON : I LIVE ON THE SW COASTLINE OF SOUTH AFRICA. MY NATURAL ENVIRONMENT IS DIRECTLY THREATENED BY THE PROPOSED DRILLING. EVENTS LIKE BP'S DEEPWATER HORIZON DISASTER MAKE IT CLEAR THAT RISKS ARE SEVERE.

2. AS INTERESTED PERSON : I AM A PHYSICIST WITH A PH.D FROM THE UNIVERSITY OF CAPE TOWN. I STUDY GLOBAL HEATING RESULTING FROM FOSSIL FUEL COMBUSTION AND AM WELL AWARE OF EXISTENTIAL RISK ASSOCIATED WITH THE PROPOSED TEEPSA EXPLORATION

Please return completed forms to SLR:

Postal Address: 5th Floor, Letterstedt House, Newlands on Main, Newlands, 7700
SMS / WhatsApp: 063 900 5536 Project e-mail: TEEPSA-567@slrconsulting.com

SLR's commitment regarding the protection of personal information: By being registered on the Project database, you authorise SLR to (1) retain and use your Personal Information as part of a contact database for this and/or other ESIA's, (2) contact you regarding this and/or other ESIA processes, (3) disclose the database to other authorised parties for lawful purposes, (4) process it for lawful purposes, and (5) include correspondence received in ESIA Reports. SLR will not process your Personal Information, other than as permitted or required by ESIA processes or as required by Law or public policy. SLR will use reasonable, appropriate security safeguards in order to protect Personal Information, and to reasonably prevent any damage to, loss of, or unauthorised access or disclosure of Personal Information, other than as required for ESIA processes or as required by any Law or public policy.

You may request for your Personal Information to be deleted from the Project database or comments to be excluded from ESIA Reports at any time by contacting SLR. However, you understand that SLR (and any authorised parties) may not be able to delete or destroy it for legal or public policy reasons. SLR will provide you with the reasons.

Subject: More information about TotalEnergies activities in Cape Town waters

Good day

I found this email address in the news. As a Cape Town resident, I'd like to please have a copy of the initial impact survey done by TotalEnergies with regards to gas exploration on the Cape Town coast. Please be so kind as to send it on or tell me where to download it.

Kind regards
Dalena Theron

No to oil and gas it will create jobs and impact on the marine environment. Just look cause in the Gulf of Mexico . Marine mammals and birds have died in the oil spill. Mussels have died. They have a problem with Offshore oil and gas. We need more Renewable energy and green hydrogen for the future .Methane is worse than greenhouse gases.

HI SLR,

In your document you state that two seismic surveys were done in this area, please confirm who did the seismic surveys and the dates and full details of the fleet that did this work.

I urge you to halt this meeting until you can provide this information as it is not contained in your documentation, or we have missed it.

We will send a response in this regard later today to yourselves and the media (copied in)

Subject: RE: TotalEnergies - ESIA for proposed exploration drilling in Block 5/6/7: REMINDER OF INVITATION FOR PUBIC MEETING IN CAPE TOWN

A further set of questions I have and want answered before attending is the following:

1. What investment will TotalEnergies be putting in the communities of Cape Town/Western Cape – RAND OR DOLLAR VALUE
2. How many South Africans will be employees, trained and have skills transferred in this process.
3. What jobs will be created and what SDE will there be
4. Please provide a full organogram with names of shareholders and ownerships of the rights holder of this exploration area and also a full organogram of the main shareholders of total energies local division Also provide their political affiliation.
5. Please provide insurance policy details in the case of an environmental or operational disaster as well as the disaster management plan
6. Will the oil be refined in South Africa if it is discovered and what price will the oil be sold to South Africa for as well as a statement of South Africa having the first right to buy at a lower price for our own reserves

Should these and the questions previously not be answered we serve notice that we oppose this exploration outright

RE: TotalEnergies - Proposed Offshore Exploration in Block 5/6/7, South-West Coast, South Africa

Good day,
I would like to be added to your database regarding the above mentioned matter.

I would also like to record my strong objection to this proposal.

The proposed coastline is a pristine ecological area with many species of marine and coastal wildlife, especially many dolphin and shark species as well as the southern right whale. This area is a tourist hot spot and brings much needed revenue into the region. The proposed drilling will potentially cause harm to the fauna and flora of the area and cause disruption to the sensitive whale and dolphin's breeding and migratory patterns and habits.

Please keep me informed of any further studies undertaken and also opportunities for the public and interested parties to comment and raise concerns and objections.

Thank you
Karlie Hadingham

Dear Sir / Madam

Attached letter refers.

TotalEnergies EP South Africa Block 567 (Pty) Ltd ("TEEPSA") has applied to the Department of Mineral Resources and Energy (DMRE) for Environmental Authorisation (EA) to undertake exploration well drilling in Block 5/6/7 off the South-West Coast of South Africa. SLR Consulting (South Africa) (Pty) Ltd ("SLR") has been appointed as the Independent Environmental Assessment Practitioner to undertake the Environmental and Social Impact Assessment (ESIA) process for the proposed project.

SLR has compiled a draft Scoping Report, which is available for a 30-day review and comment period from 20 May to 20 June 2022. Refer to letter for report availability. Comments on the draft Scoping Report should reach SLR by **no later than 20 June 2022**.

We cordially invite all stakeholders to attend the planned public meetings listed in Table 2. Refer to letter for meeting details.

Your sincerely,

TEEPSA-567 Stakeholder Engagement Team

AFRIKAANS

Geagte Heer/Dame,

Aangehegte brief verwys.

TotalEnergies EP South Africa Block 567 (Pty) Ltd ("TEEPSA") het by die Departement van Mineraal hulpbronne en Energie (DMRE) aansoek gedoen om Omgewingsmagtiging vir die onderneem van eksplorasiëboorwerk in Blok 5/6/7 langs die Suidweskus van Suid-Afrika. SLR Consulting (South Africa) (Pty) Ltd ("SLR") is aangestel as die onafhanklike Omgewingskonsultant om die OSIS proses vir die voorgestelde projek te onderneem.

To Whom It May Concern:

CAPENATURE'S REQUIREMENTS FOR PROVIDING COMMENTS ON DEVELOPMENT APPLICATIONS.

CapeNature is the statutory custodian of biodiversity in the Western Cape¹ and commenting authority concerning potential impacts on biodiversity and ecological processes. Our comments only pertain to the biodiversity related impacts of the development application. The effective management of biodiversity is a requirement in terms of Section 41 (a) of the National Environmental Management: Biodiversity Act (Act No. 10 of 2004)². Thus, this letter and Annexure A outline requirements for land use applications and this should be considered when submitting applications to CapeNature for commenting.

Protecting biodiversity beyond the boundaries of Protected Areas is essential to maintain the integrity of ecosystems across broader landscapes. The Western Cape Biodiversity Spatial Plan (WCBSP 2017)³ provides guidelines on land use activities that are compatible with maintaining the ecological integrity of terrestrial and aquatic Critical Biodiversity Areas (CBA) and Ecological Support Areas (ESA) on land outside of Protected Areas.

Preventing biodiversity loss in the Western Cape

CapeNature's role is to provide advice on biodiversity related impacts on applications that may either change land uses or trigger a NEMA listed activity⁴. Some of the type of applications we provide comments on include *inter alia* agricultural, renewable energy, mining, water-use related, recreational and other applications submitted in terms of NEMA. We may also provide comments on planning applications in terms of SPLUMA as well as provincial and national policies, guidelines, and legislation. During the commenting process, CapeNature will highlight any threats that may result from the development and any impacts on CBAs (terrestrial and aquatic) and ecological infrastructure. CapeNature does not support developments that result in irreversible loss of habitat and ecological functioning in threatened

¹ Section 9, Western Cape Nature Conservation Board Act 15 of 1998. 1998. 24 December 1998.

² National Environmental Management: Biodiversity Act 10 of 2004. 2004. Government Gazette No. 26436, 7 June 2004.

³ Pool-Stanvliet, R., Duffell-Canham, A., Pence, G. and Smart, R. 2017. The Western Cape Biodiversity Spatial Plan Handbook. Stellenbosch: CapeNature.

⁴ National Environmental Management Act No. 107 of 1998. 2017. Amendments to the Environmental Impact Assessment Regulations, 2014. Government Gazette No. 40772, 7 April 2017.

The Western Cape Nature Conservation Board trading as **CapeNature**

Board Members: Associate Prof Denver Hendricks (Chairperson), Prof Gavin Maneveldt (Vice Chairperson), Ms Marguerite Loubser, Mr Mervyn Burton, Dr Colin Johnson, Prof Aubrey Redlinghuis, Mr Paul Slack

ecosystems (as identified in NEM:BA⁵ and the updated National Biodiversity Assessment, 2018⁶) or sensitive areas such as aquatic and terrestrial CBAs and ESAs (as identified by the WCBSP, 2017) and Freshwater Ecosystem Priority Areas (as identified by the National Freshwater Ecosystem Priority Areas)⁷. If a land use activity results in negative impacts on the environment and their ecological processes, then mitigation should be proposed in line with the Mitigation Hierarchy (DEA&DP 2011)⁸. All alternatives considered should be reasonable and feasible.

Applications that require review by CapeNature should demonstrate how the proponent intends on complying with the principles contained in Section 2 of the National Environmental Management Act (Act No. 107 of 1998)⁹, as amended (NEMA), which, amongst other things, indicates that environmental management should:

- In order of priority aim to avoid, minimise, or remedy disturbance of ecosystems and loss of biodiversity;
- Avoid degradation of the environment;
- Avoid jeopardizing ecosystem integrity;
- Pursue the best practicable environmental option by means of integrated environmental management;
- Protect the environment as the people's common heritage;
- Control and minimise environmental damage; and
- Pay specific attention to management and planning procedures pertaining to sensitive, vulnerable, highly dynamic, or stressed ecosystems.

These principles must underpin decision-making concerning matters that may affect the environment. As such, it is incumbent upon the proponent to show how proposed activities would comply with the above-mentioned principles and thereby contribute towards the achievement of sustainable development as defined by the NEMA.

Status of CapeNature's comment

CapeNature may be consulted to discuss any aspect of the development application, during the public participation process. However, verbal discussions are not considered adequate and only written comment from CapeNature following a review of a development application is considered formal communication. We do reserve the right to revise our initial comments on any new information that may be received, or we may request additional information.

Format of reports

Please help us provide you with a timely response by supplying all information in a readily accessible format:

- a. We require all notifications of Basic Assessment and Environmental Impact Assessment Processes be sent via email. The email must contain a link to a site containing all the respective reports including the main report, locality maps, all alternative layout plans and all biodiversity related specialist reports. Please do not

⁵ National Environmental Management: Biodiversity Act 10 of 2004. 2011. National list of ecosystems that are threatened and in need of protection. Government Gazette No. 34809.

⁹ National Environmental Management Act No. 107 of 1998. 2014. Government Gazette No. 19519, 18 December 2014.

attach the main documents and appendices to the email. The only attachments to the e-mail must be a cover letter, executive summary, and the locality map (including relevant biodiversity overlay maps). Please make sure the Farm/Erf number(s) is clear (preferably in the title) and the municipality. Copies couriered to office addresses may be acceptable as well, but please check with the relevant CapeNature contact.

- b. Please save all reports and appendices as separate files and not one combined file.
- c. To facilitate assessment of potential impacts, we request that maps of proposed development layouts be overlaid with identified environmental features of a site. If provided separately, maps should be produced at the same scale.
- d. Please provide GIS shapefiles of the proposed development footprint, particularly for linear features or for combined applications with numerous sites,

We receive a large number of reports and need to treat applicants and consultants fairly, therefore applications will be processed from date of receipt within the required number of days as stipulated by the DEA&DP, DFFE, the DMRE or other competent authority.

Land Use Planning, Development applications, Environmental Management Frameworks, policies, and legislation can be directed to the following CapeNature officials (also refer to Figure 1):

Annexure A: CapeNature's Requirements Regarding Development Applications

The aim of this annexure is to provide stakeholders with guidelines to consider the biodiversity and ecological infrastructure of the Western Cape when drafting development applications. To assist stakeholders and planners to incorporate the Western Cape Biodiversity Spatial Planning handbook¹ with strategic and practical guidelines for their planning and decision-making.

Guidelines and biodiversity plans

1. The Western Cape Department of Environmental Affairs and Development Planning (DEA&DP) has produced a series of guideline documents (March 2013) that provide clear guidance on the EIA process². Specifically, they aim to improve the capacity of environmental assessment practitioners (EAPs) and specialists to draft appropriate terms of reference that meet the information requirements for informed environmental decision-making. The guideline must be read in conjunction with the National Environmental Management Act (NEMA), the NEMA EIA regulations, relevant specific environmental management Act (SEMA(s)) and their regulations. In addition, the Fynbos Forum Ecosystems Guidelines for Environmental Assessment in the Western Cape, Edition 2 (2016)³ provides appropriate terms of reference for Botanical Assessments. All stakeholders should also make use of the CapeNature Western Cape Biodiversity Spatial Plan (WCBSP, 2017) Land Use Advice (LUA) Handbook. The implementation of relevant recommendations and/or actions as stipulated in the documents below should be critically considered, regardless of whether a Scoping, Basic Assessment, and EIA or any other authorisation process is to be undertaken. By consulting these documents and meeting the requirements for submission of accurate and relevant information, EAP's, specialists and stakeholders can support efficient and accountable decision-making. We kindly request that your environmental assessment is informed by the following documents:
 - a. Brownlie S (2005) *Guideline for involving biodiversity specialists in EIA processes: Edition 1*. CSIR Report No ENV-S-C 2005 053 C. Republic of South Africa, Provincial Government Western Cape, Department of Environmental Affairs and Development Planning, Cape Town⁴.
 - b. De Villiers C.C., Driver A., Clark B., Euston-Brown D.I.W., Day E.G., Job N., Helme N.A., Holmes P.M., Brownlie S. and A.B. Rebelo (2016). *Ecosystem Guidelines for Environmental Assessment in the Western Cape*, Edition 2. Fynbos Forum, Cape Town.
 - c. Pool-Stanvliet, R., Duffell-Canham, A., Pence, G. & Smart, R. (2017). *The Western Cape Biodiversity Spatial Plan Handbook*. Stellenbosch: CapeNature.
 - d. The third National Biodiversity Assessment (2018)⁵ provides information about the state of South Africa's threatened ecosystem status.
 - e. The latest provincial biodiversity framework (conservation plan), which reflects identified Critical Biodiversity Areas; currently is the WCBSP 2017, available on SANBI's Biodiversity GIS website⁶. The most recent conservation plans, and their associated reports and guidelines are available at the SANBI Biodiversity GIS Unit website⁷. The mapping tools are useful, but please note that while these tools can help

Biodiversity 'red flags' in the Western Cape

2. The following factors must be considered during project planning and assessment:

- a. CapeNature *does not support* activities that may negatively impact on the following habitats and their ecological functioning:
 - i. Rivers, wetlands, flood plains, estuaries, tidal flats or salt marshes and groundwater-dependent communities or ecosystems.
 - ii. Representative habitat in Critically Endangered and Endangered ecosystems.
 - iii. Any area that has been identified as a Critical Biodiversity Area or Ecological Support Areas as identified by the most recent systematic conservation plan (WCBSP, 2017).
 - iv. Any other special habitats that may contain a unique assemblage of species. This could include *inter alia*, dolomite outcrops, quartz or ferricrete patches.
 - v. Any habitat that may contain rare, threatened or range-restricted floral or faunal species (Species of Conservation Concern).
 - vi. Natural or mostly natural habitat in an ecological corridor or along a vegetation boundary (including frontal dune systems).
 - vii. Remaining natural forest habitat without approval from the DFFE as a custodian of forestry resources in South Africa.

Appropriate buffers must be determined by a suitably qualified specialist to avoid impacting on these habitats and particular attention should be paid to avoiding the loss of intact habitat, maximizing connectivity at a landscape scale, maximizing habitat heterogeneity, and reducing fragmentation at a local and regional scale. The buffers should guide the development plans in order to reduce any present or future impact

on the habitat. Once suitable buffers have been mapped it should be illustrated on a map and included in the application.

Invasive alien species threaten indigenous species and have numerous negative impacts on ecosystem functioning. Please also note that an infestation by alien plants does not necessarily mean that an area is not important for biodiversity conservation, nor is the subsequent removal of alien vegetation from a property regarded as a mitigation measure as this is a legal requirement¹⁴.

- b. The Cape Floristic Region is largely a fire-dependent system and natural fire regimes must be maintained and managed in the landscape. The exclusion of fire from certain habitats will be considered unacceptable as this may ultimately cause the loss of species. In terms of section 12 (1) and 2 (a) of National Veld and Forest Act¹⁵ Where appropriate, adequate fire-breaks must be prepared and maintained around the property to reasonably prevent the spread of unwanted fires in the area. The fire-breaks may be considered part of the development footprint. Fire-breaks must be brush-cut and vegetation must not be completely removed. Brush-cutting under power lines must occur as infrequently as possible as brush-cutting will lead to loss of species diversity over time. A fire-risk assessment can help inform an appropriate layout for developments adjacent to fire-prone vegetation. Landowners are encouraged to apply for membership with their local Fire Protection Association (FPA) and EAPs are encouraged to obtain comment from them on development applications.
- c. CapeNature has concerns regarding land uses or activities within declared Mountain Catchment Areas (MCA), especially activities which may affect the quality or volume of water downstream of any of these regions. These activities could *inter alia* include buildings, hard infrastructure, canalization, cut-off drains and cultivation within these regions. WCBSP categories are not mapped within formally protected areas such as MCAs, as it is assumed that the objectives of the MCA Act apply. The MCA objectives are that these areas will be managed in a manner consistent with the prevention of soil erosion, the protection of natural vegetation, and the management of invasive alien plants (a.k.a., 'intruding vegetation'). In addition to which, the purposes of NEM: PAA (to be read, interpreted and applied in conjunction with the NEM: BA), need to be upheld. These NEM: PAA purposes are: *"To provide for the protection and conservation of ecologically viable areas representative of South Africa's biological diversity and its natural landscapes and seascapes; ...[and] for the management of those areas..."*. In relation to a protected area, management includes control, protection, conservation, maintenance and rehabilitation of the protected area, with due regard to the use and extraction of biological resources, community-based practices and benefit-sharing activities in the area in a manner consistent with the NEM: BA.
- d. Water is a limited resource in the Western Cape. Water requirements for proposed activities and the potential impact on broader surface and ground water resources must be rigorously assessed and considered by an aquatic/freshwater specialist and/or ground water specialist, including the cumulative impact if other developments are also taking place in an area. Cumulative impacts on infrastructure such as Waste Water Treatment Works must also be considered. It is also recommended that where possible all developments should consider recycling grey water for suitable usage.

¹⁴ Government Gazette No. 37885, GN No. R. 598 (2014) National Environmental Management: Biodiversity Act, 2004 (Act No. 10 of 2004) Alien and Invasive Species Regulations, 2014.

¹⁵ National Veld and Forest Act 1998 (Act 101 of 1998) Government Gazette: 19515
The Western Cape Nature Conservation Board trading as **CapeNature**

Board Members: Associate Prof Denver Hendricks (Chairperson), Prof Gavin Maneveldt (Vice Chairperson), Ms Marguerite Loubser, Mr Mervyn Burton, Dr Colin Johnson, Prof Aubrey Redlinghuis, Mr Paul Slack

Groundwater use for bulk supply purposes and irrigation must be assessed rigorously with specific reference to the possible groundwater-surface water interfaces. Groundwater use assessments must include the identification of possible groundwater dependent ecosystems and/or possible interfaces with surface resources and not only potential anthropogenic uses. Aquifers need to be described in terms of: aquifer type, aquifer characteristics, aquifer condition, as well as aquifer recharge and yield¹⁶.

- e. Rehabilitation of any disturbed ecosystems is only considered successful when the ecosystem has returned to an ecologically functional state and has a similar species assemblage as its natural state. Such applications must have a complete rehabilitation plan appended to submitted documentation. It should also be noted that CapeNature will not support new mining applications on property where previously mined areas have not been suitably rehabilitated to an ecologically functional state and have been officially closed by the DMR. Mining is not permitted within a NEM: PAA registered protected area and CapeNature will not support any development proposal or amendment which contravenes this.
 - f. Activities which may cause fragmentation of CBAs leading to loss of ecological connectivity are not supported by CapeNature.
3. Specialist assessment(s) should be undertaken if any of the above-mentioned circumstances prevail or if there is any doubt about the biodiversity value of the potentially impacted areas. The opportunities and constraints of the receiving environment should be used to inform the desirability and layout of any development proposal to ensure that developments do not compromise the biodiversity value of the area. When assessing the impact of the development on CBA, the EAP must investigate the reasons (features) behind the determination of the CBA and critically assess whether these will be negatively impacted by the proposed construction or operational phase activities.
 4. The Mitigation Hierarchy in terms of the Department of Environmental Affairs and Development Planning guideline documentation must be adhered to.

Commissioning of biodiversity specialists

5. A specialist should be involved if the proposed activity will have a significant impact on the environment and its processes or where there is insufficient information to determine whether unavoidable impacts would be significant. A suitably qualified and experienced specialist is critical to ensuring that the necessary information is provided for informed decision-making. Please take note of the following recommendations¹⁷:

Biodiversity specialists should:

- a. Be competent at interpreting and evaluating information and able to explain the direct and indirect consequences of an activity to biodiversity;
- b. Have appropriate formal training in his/her field of expertise;
- c. Have sufficient practical experience working in the specific ecosystems of the affected region and thereby adding value to the planning and design of the proposed project/activity;
- d. Be able to trace impact pathways and identify indirect or cumulative impacts and consider ecosystem goods and services;

¹⁶ For groundwater-related assessments, consult: Saayman, I (2005) *Guideline for involving hydrogeologists in EIA processes: Edition 1*. CSIR Report No ENV-S-C 2005 053 D. Republic of South Africa, Provincial Government of the Western Cape, Department of Environmental Affairs & Development Planning, Cape Town.

¹⁷ For more information/details please refer to the Guideline for involving biodiversity specialists in EIA processes (DEA&DP 2005).

The Western Cape Nature Conservation Board trading as **CapeNature**

Board Members: Associate Prof Denver Hendricks (Chairperson), Prof Gavin Maneveldt (Vice Chairperson), Ms Marguerite Loubser, Mr Mervyn Burton, Dr Colin Johnson, Prof Aubrey Redlinghuis, Mr Paul Slack

- e. Have good knowledge relating to assessment techniques and to relevant legislation, policies and guidelines;
- f. Be independent; and
- g. Be registered with the South African Council for Natural Scientific Professions (SACNASP).

CapeNature also requests that specialists be asked to review the information in the report to be submitted for decision-making to confirm that their opinion has been adequately reflected.

Permit requirements

6. Please note that according to Section 63(1) of the Western Cape Nature Conservation Laws Amendment Act No. 3 of 2000¹⁸:

No person shall—

- (a) uproot the plant in the process of picking the flower of any flora;
- (b) without a permit—
 - i. pick any endangered or protected flora, or
 - ii. pick any flora on a public road or on the land on either side of such road within ninety meters from the center of such road, or
- (c) pick any protected or indigenous unprotected flora on land of which he or she is not the owner, without the permission of the owner of such land or of any person authorised by such owner to grant such permission.

If these activities will be involved in the application (for example search and rescue) make sure to apply for a CapeNature permit to carry out these activities. CapeNature is the regulatory authority in the Western Cape for the issuing of permits for fauna, flora, hunting and CITES. To obtain such permits please contact the relevant Conservation Services Officials at the nearest CapeNature Regional Office or contact the Permit Office on 087 087 4088. The following website address <http://www.capenature.co.za/permits-information/> provides information for the self-service permit portal.

Mining and Prospecting Applications

7. Please note that the DMRE no longer sends copies of applications to commenting authorities. It is now the responsibility of the consultant working for the applicant to ensure that all commenting authorities receive the relevant documents. Therefore, point 5 above applies to mining and prospecting applications as well. The consultant must also provide electronic copies of the EA once received.

¹⁸ This will be repealed when the Western Cape Biodiversity Bill is promulgated
